Title:	How to call two indoor stations using	Version:	v1.0	Date:	9/25/2017
	villa door station (FW 1.4.71)	1 '	1 1	(
Product:	Video Intercom Device	Page:	1 of 5		

Preparation

- 1. Two indoor stations and one villa door station;
- 2. Client software iVMS-4200 (V2.6.2.50).

Note:

1. All devices' firmware version should be the same (V1.4.71 it is in this document);

2. This guide only uses a simple video intercom system to demonstrate the function, which only contains indoor stations and villa door station. No master station is contained.

Step 1: Add Devices to iVMS-4200

- Go to Device Management-> Add to Client to add all devices (two indoor stations and one villa door station) to iVMS-4200.;
- 2) Make sure all device IP addresses are in the same local network. Click **Modify Netinfo** to modify if they are not.

+ Add to Client + Add All Modify Netinfo * Reset Password * Adivale							
IP -	Device Type	Firmware Version	Security	Server Port	Device Serial	Start Time	Added
10.5.8.150	DS-KH8300-T	V1.4.71build 170515	Active	8000	DS-KH8300-T	2017-09-20 14:43:31	No

③ Time Parameters		Save					

4) Go to **Intercom**->**Dial** to link the button on villa door station to indoor stations. For example, 1-

0-1 means that button 1 could call room 1, 2-0-2 means that button 2 could call room 2;

5) Click Save to finish;

Step 3: Set Main Indoor Station 1

1) Select one indoor station, click **Remote Configuration**;

- 2) Go to Intercom-> ID Configuration, select Device Type as Indoor Station;
- 3) Set a room number (ranges from 1-9999) for it;
- 4) Click Save to finish;
